

Sundance expansion, Provo golf course are part of cooperative canyon master plan.

Cooperation on canyon plan

Continued from U-1
groups all interested in the same goal. "The public and private mix is very exciting," he said. "The combined weight of state, federal, and local agencies and groups will really help us get the plan off the ground."

So far, all groups involved have agreed on preserving the canyon and developing a plan that everyone can

live with, he said.

"We have gotten super staff commitment from all the groups, and it looks like we will be able to get a plan that everyone likes," he said.

Sundance is working on a \$20 million expansion plan, and Provo is developing plans for an 18-hole golf course on city property in the

canyon.

Ferguson said there is no reason why development already in the planning stages can't be designed to fit into the master plan.

"It's a beautiful canyon, with lots of wildlife, and I think we all want to keep it that way," Ferguson said. "This is a good way to do that."

He credited the achievement to the plant's high-quality work force, management and leadership.

According to Patten, March has been Geneva's most profitable month in the past three years. He said the plant also did well in January and February.

"Geneva can't be overlooked," Patten said. "We don't think our company (U.S. Steel) can deny us the opportunity to be viable through the 1990s. We would like the opportunity to operate at a higher capacity and to lower our costs."

To have that opportunity, Patten said, U.S. Steel needs to invest approximately \$100 million into capital equipment for the plant. A \$12 million water recycling system is currently being built at the plant.

With domestic investment and legislation favoring the U.S. steel industry, Patten said, there is no reason Geneva would have to close its doors.

Although Geneva still has about 1,300 workers on layoff, Patten said, the plant has raised plant operations over the past few years from as few as five eight-hour shifts a week to its current 18 eight-hour shifts a week.

OREM — Local members of the United Steelworkers of America will join approximately 4,700 other affiliated unions throughout the United States, Puerto Rico and Canada this week to select a new union president.

Thursday's special election became necessary with the death last fall of then President Lloyd McBride. The newly elected president will serve until the next regularly scheduled election Nov. 26, 1985, for all international officers and district directors.

Lynn Williams, a candidate for the USWA presidency, has been serving as acting union president since McBride's death. Joining Williams in the union's presidential race is Frank S. McKee, international USWA treasurer. Both candidates recently visited the steelworkers hall in Orem during stumping stops throughout the West.

"It's important for every member of the union to cast his vote," said Dennis Holdaway, president of Local 2701. Though Local 2701 nominated McKee last fall, Holdaway said local
